

**Introducing the New 3M™ Solus™ 1000 Series Safety Eyewear and 3M™ Goggle Gear 500 Series Goggle with Scotchgard™ Anti-Fog Premium Coating**

**Advance anti-fog technology applied to help workers see clearly, longer**

Dear 3M Team and Partners:

We are extremely excited to bring to you one of the biggest product launches in the protective eyewear category in years. Scotchgard™ Anti-Fog Coating Technology brings higher performance to safety eyewear.

Fogging is one of the most common problems for protective eyewear users. A fogged lens can be frustrating and dangerous. Removing eyewear to wipe away fog can expose eyes to potentially dangerous workplace impact hazards and debris. The Scotchgard™ Anti-Fog Coating resists fogging longer than traditional anti-fog coatings, even after washing multiple times.

Scotchgard™ Anti-Fog Coating is designed for working in challenging situations such as hot & humid conditions, indoor & outdoor work, physically demanding tasks and climate-controlled areas.

Scotchgard™ Anti-Fog Coating is now available on Solus™ 1000 Series safety eyewear in a range of lens colors (clear, grey or amber). Other features include removable temples, soft nose bridge, padded temples for added comfort, optional elastic strap and vented, removable foam gasket to help reduce eye exposure.

Scotchgard™ Anti-Fog Coating is also available on 3M™ Goggle Gear 500 Series splash goggle with a low-profile design, adjustable strap and optional prescription insert. All come with polycarbonate lenses, which absorb 99.9% of UV rays.

There are clear facts to choose Scotchgard Anti-Fog Coated eyewear:

- Scotchgard™ Anti-Fog Coating lasts longer than traditional anti-fog coatings, helping to increase eyewear performance in wet and steamy environments
- Workers may enjoy reliable, clearer sight longer, because the coating, with its active ingredient, is bonded to the lens
- The coating retains its effectiveness for at least 25 washings, allowing workers to wear their eyewear longer
- The coating can be disinfected with diluted bleach soaking or alcohol wipes without losing its anti-fog performance
- Workers can feel confident wearing Scotchgard™ Anti-Fog coated eyewear because it meets the requirements of ANSI Z87.1 and CSA Z94.

Get out of the fog with a new family of eyewear.

\*The 3M billing is a case.

Our customers will benefit from the many advantages of these new eyewear models and premium performance coating. We currently do not know of any other coating in the market with better performance results in fogging and bondage to the lens.

Help us communicate this to all end users who face challenges with fogging in their worksite, visit our featured web site to learn more on October 30<sup>th</sup>, and for any support you need for this launch.

Successful Selling!

Sincerely,

**Javiera Troncoso**
