

A New Angle on Access

Ultimate Access in Tight Situations

H.K. Porter Pivot Handle Cable Cutter

The Pivot Handle Cable Cutter from H.K. Porter provides superior access in narrow spaces like trenches, transformer vaults, and manholes because of its unique folding handle. It allows you to get the cutting head into places that would be impossible with standard cable cutters and lets you position your body for the best leverage no matter where you are cutting.

The induction hardened cutting edges can cut up to 500 MCM copper, 750 MCM aluminum, and 1-3/8-inch communications cable while providing extended blade life. The heavy-duty clevis design of the handle pivot adds strength and protects the ratchet mechanism.

The Pivot Handle Cable Cutter is made in the USA and is available in two overall lengths: 25-inch and 21-inch.

Innovative Pivoting Handles

Handle collapses to allow access in tight areas including manholes, trenches, transformers vaults, and other areas.

Lightweight and Durable

Fiberglass handles can stand years of heavy use.

Made in the USA!

Maximum Access & Leverage No Matter Where You Cut!

44" Handle span collapses to an incredible 16.25".

Cutting Applications and Capacities

Cu Power up to 500 MCM

Al Power up to 750 MCM
